

When will Etana power plant be built in South Africa?

The plant's construction is expected to come online by the end of 2026 and will boast an output of 120MW. Additionally, GuarantCo and British International Investment have provided \$100-million in default guarantee finance to the South African green energy company Etana.

Is Eskom still the largest power producer in South Africa?

Eskom is still undeniably the largest power producer in South Africa-- but some green energy companies are confident they can punch above their weight. Read more: 'Exponential renewables increase' expected in SA's revised energy blueprint

Should young South Africans be able to participate in the photovoltaic industry?

In her presentation, CEO of the SAPVIA (The South African Photovoltaic Industry Association), Dr Rethabile Melamu, stressed the need to skill young South Africans to participate and take full advantage of the huge opportunities in this industry.

Is Neosun South Africa a good investment?

The cumulative savings are estimated to exceed R164-million over the plant's lifespan, making it a highly cost-effective renewable energy investment," said Jeanine Jackson, head of sales for Neosun South Africa. It was not just environmental consciousness that gave renewable power generation an advantage, said Fourie.

Why is South Africa focusing on concentrating solar power?

The government is focussing on diversifying the power mix by introducing natural gas and renewables, including concentrating solar power (CSP); South Africa has excellent natural resources for CSP development.

Could battery systems help South Africa's 'inflexible' power system?

Battery systems, Fourie told Daily Maverick, could provide relief to South Africa's "inflexible" power system. "There's limited flexibility in the system for energy sources to be quickly ramped up or down.
