

What happened at a lithium battery factory in South Korea?

A fire at a lithium battery manufacturing factory near South Korea's capital on Monday left at least 16 people dead, seven injured and six missing, officials said. Rescue workers at the factory in Hwaseong city, just south of Seoul, retrieved the bodies after combing through the site, local fire official Kim Jin-young told a televised briefing.

What caused a battery fire in South Korea?

Kim said a witness told authorities that the fire began after batteries exploded as workers were examining and packaging them, but the exact cause would be investigated. Firefighters worked at the site of a burnt lithium battery manufacturing factory in Hwaseong, South Korea, on June 24, 2024.
