

Can Tokelau support itself with solar energy?

Tokelau, an island nation in the South Pacific, is now completely able to support itself with solar energy. Elly Earls met Joseph Mayhew of the New Zealand Aid Programme to find out how this tiny collection of atolls has become almost 100% self-sufficient in less than 12 months.

Is Tokelau a solar powered island?

In today's edition, Stephanie Bandi reviewed the newly released documentary Tokelau: The Solar Powered Island of the Future which showcases how the island nation harnesses the energy of the sun to power its three atolls. It's been a long year and it's usually around this time that you might be feeling a bit burnout...

How do Tokelau locals get supplies from Samoa?

Tokelau locals get all essential supplies brought from Samoa by boat. (file photo). (file photo: AFP) In today's edition of Reel Talk, Stephanie Bandi reviewed Tokelau: The Solar Powered Island of the Future a documentary that showcases how the island nation harnesses the energy of the sun to power its three atolls.

Why is electricity so expensive in Tokelau?

Before the PowerSmart systems were installed on the nation's three atolls, Tokelau was highly dependent on imported fossil fuels to meet its energy needs and therefore vulnerable to international price fluctuations and increasing fuel costs, making electricity extremely expensive for both households and businesses.

How much money does Tokelau spend importing fuels a year?

Tokelau spends about \$829,000 every year to import fuels. The government of Tokelau now plans to spend these savings on other essential services like health and education. The savings will also be used to repay the grants and financial assistance the government received from New Zealand government for this project.
