

Southeast asia user-side energy storage policy

Does ASEAN need enabling policies for energy storage?

However, ASEAN has many untapped markets for energy storage applications. Hence, to maximise the market potential and accelerate the low carbon transition in ASEAN, this policy brief recommends several enabling policies for energy storage.

Are Southeast Asian countries at a crossroads regarding their shared energy future?

Southeast Asian countries stand at a crossroads concerning their shared energy future and heavily rely on fossil fuels for transport and electricity. Within Asia, especially India and China lead the world renewable energy generation undergoing a period of energy transition and economic transformation.

Is Southeast Asia a good place to invest in energy storage?

Image: ACEN. There has been an uptick in energy storage investment in Southeast Asia, a region still largely powered by coal and experiencing high growth in population and energy demand. Andy Colthorpe speaks with companies working to establish a framework of opportunities in the region.

Is Southeast Asia facing energy security risks?

Today's policy settings leave Southeast Asia facing significant energy security risks. In the STEPS, Southeast Asia's annual oil import bill surpasses USD 200 billion by mid-century, up from USD 130 billion today, and the region is set to become a net importer of gas by the late 2020s.

How can International Development Support Southeast Asia's energy transitions?

International development finance and support is crucial to Southeast Asia's energy transitions. The Just Energy Transition Partnerships (JETPs) launched in 2021 in Indonesia and Viet Nam provide a framework to mobilise capital for investments in clean energy and support the phasing out of coal-fired power generation.

Does Southeast Asia have a sustainable future?

The region also sees a steady worsening in its energy trade balance as fossil fuel demand outpaces local production. Governments across Southeast Asia have set out long-term plans for a more secure and sustainable future. For example, six Southeast Asian countries have already announced net zero emissions and carbon neutrality targets.

One leading example of proactive policy engagement is to be found in the Philippines, the government of which views energy storage as key to success in delivering renewable energy targets. During the ESS Asia event, ...

3 ???· EMA awards S\$7.8 million in research grants to explore battery energy storage solutions. With many South-east Asian nations committed to transitioning to cleaner energy and rolling out roadmaps to guide

their plants and goals, ...

Carbon capture, utilisation and storage (CCUS) technologies are set to play an important role in supporting clean energy transitions in Southeast Asia. CCUS can address ...
