How to find a good energy contract in the Netherlands?

You can use an energy comparison website to find solid and affordable contract. Several energy suppliers in The Netherlands offer their customers the possibility to choose for renewable (green) energy. However, it is important to state that not all electricity is produced using renewable energy sources in The Netherlands.

What are the different types of energy contracts in the Netherlands?

Energy suppliers in The Netherlands offer quite a large variety of energy contracts. The main differences are explained below. There are contracts that have a set tariff, for example, one, two or three years. When you choose this type of contract, the tariff does not change over time.

How do I find a reliable energy supplier in the Netherlands?

Finding a supplier may be difficult because of the language barrier. Energievergelijk is an independent organisation that can help expats with advice and answers regarding the Dutch energy market. The Netherlands has around 60 energy suppliers that each offer different energy contracts and conditions.

Do I need a gas & electricity contract in the Netherlands?

When moving to The Netherlands your new home will most likely have a working electricity and gas connection. However, you are obliged to apply for a gas and electricity contract and find a suitable utility company, also called 'energy supplier'. Finding a supplier may be difficult because of the language barrier.

How much energy does the Netherlands produce?

The Netherlands' primary energy production has decreased in recent years, falling to some 33.4 million metric tons of oil equivalent. Gas is the main fuel produced in the country, while renewables account for less than 20 percent.
