

What are the different types of energy storage policy?

Approximately 16 states have adopted some form of energy storage policy, which broadly fall into the following categories: procurement targets, regulatory adaption, demonstration programs, financial incentives, and consumer protections. Below we give an overview of each of these energy storage policy categories.

Which financial institutions invest in energy storage companies?

Many financial institutions invested in energy storage companies. Examples include Hillhouse Capital's 10.6 billion RMB investment in CATL, and the launch of IPOs by numerous energy storage companies such as Pylontech and Tianneng to raise funds to expand business. Second, new forces have sprung up, accelerating the deployment of energy storage.

What are the characteristics of energy storage industry development in China?

Throughout 2020, energy storage industry development in China displayed five major characteristics: 1. New Integration Trends Appeared The integration of renewable energy with energy storage became a general trend in 2020.

What is the leasing model for energy storage projects?

Another such model is the leasing model for front-of-the-meter energy storage projects adopted by Hunan province in 2018, and the subsequent 2020 upgraded version of the leasing model which applied to energy storage paired with renewable generation and designed to split investment risks between each entity.

Which energy storage technologies have been made a breakthrough?

Breakthroughs have been made in a variety of energy storage technologies. Lithium-ion battery development trends continued toward greater capacities and longer lifespans. CATL developed new LiFePO batteries which offer ultra long life capabilities, while BYD launched "blade" batteries to further improve battery cell capacities.

How are 'integrated energy stations' extending the 'cross-domain' applications of energy storage?

As the construction of new infrastructure such as 5G cell towers, data centers, and EV charging stations accelerates, many regions have used price policies and financial support policies to support the construction of "integrated energy stations", which has helped to extend the "cross-domain" applications of behind-the-meter energy storage. 2.

Since the release of the policy, numerous state-owned enterprises and provincial/municipal governments have signed "unified" demonstration project agreements. The planning and implementation of these ...
