

Notes: Insert only an empty spare drive into the destination NAS and install DSM 7.0.1. After the installation, power off the NAS, replace the spare drive with the drives from the ...

I now have a corrupted save-file, which seems to have a partially saved electric network in it. My RAM is fixed now and the save-file loads and works normally just fine, but as ...

ZFS lacks an "fsck" or "chkdsk" function to repair files, so once a file is corrupted, ZFS uses the checksum to note the file differs from the checksum and recover it, if possible. So, in the case ...

I promise I took time to try on my own (for about 5h if I add yesterday), made some research... but nope, my device says it's corrupt and will power off in 30s. I still am able to ...
