OverviewDifference between a storage heater and an instant heaterSolarFossil fuel fired water heatersElectric water heatersWoodCorrosion and its preventionSee alsoThe primary difference between a storage heater and an instant heater is that a storage heater heats the water first and stores it for later use, while an instant heater heats the water on demand. Instant water heaters, as the name suggests, provide hot water almost instantaneously. There is hardly 1 or 2 minutes of heating time after which hot water can be accessed. But given the low storage capacity (max 5-6 liters (1.3-1.6 U.S. gal) at a given point of time) of these types of he...
