

Is solar energy making a comeback in Sudan?

Fortunately, the country is now witnessing a comeback to solar energy as it is an effective tool to drive development, employment, and stability - particularly in rural and agriculture-focused communities. "In Sudan, access to energy is a critical tool, and solar is an effective way to achieve this.

Does Sudan have solar energy?

Solar energy has the greatest potential for use in Sudan compared to other forms of RE. Sudan possesses an average annual radiation range of 436 to 639 W/m² per year, which exceeds the annual global average. The period of solar radiation in the country is between 8.5 and 11 hours per day.

What should Sudan's government do about solar energy?

Mr. Afanasiev advised the Sudan's government to continue its current direction of expansion of renewable energy solutions and continue efforts to make solar technology as accessible as possible. The cost should be reduced by tax and duty exemptions.

How can Sudan achieve energy self-sufficiency?

Encouraging solar and wind power in the country's energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

How can Sudan transform its energy sector?

A comprehensive package of technical and financial assistance will be needed to transform Sudan's energy sector. This will involve the development of risk management strategies that effectively promote public and private investments into scaled-up sustainable energy solutions.

Can solar power irrigation pumps in Sudan?

Solar panels power irrigation pumps on a farm in Northern State (UNDP Sudan/Muhanad Sameer) KHARTOUM (Sudan) - Sudan was one of the first nations to understand the importance of renewable energy. In this bid, the country took good steps in early 1980s for the development of rural areas via the technologies of solar and wind energies.
