

Shell discovered the Apyauk gas field 50 kilometres northwest of Yangon in 1991. Myanmar is today primarily a natural gas producer. As of 2015, Myanmar exports gas to Thailand and China. Myanmar had proven gas reserves of 10 trillion cubic feet in 2012, with an annual production capacity of 416 BcF.

On 22 January 2022, TotalEnergies and Chevron would later announce its departure from Myanmar in response to the human rights abuses from the military junta. TotalEnergies also calls for sanctions in response to such actions in Myanmar. ^a b "Total Myanmar - Oil and Gas in Myanmar". Burma.total.com. Archived from the original on 2015-04-15.

The downstream distribution network in Myanmar remains very under-developed with limited access to foreigners. The natural gas on shore extraction sites have been areas of continued human rights violations against local ethnic groups.

Leading inverter solution supplierSungrow is working with Super Energy,a leading renewable energy provider in South East Asia to build Southeast Asian largest battery energy storage system (BESS) project.

This agreement was the driver for Super Energy and Sungrow's cooperation on this major Thai BESS project. Besides, this plant is also a pioneer of SPP Hybrid Firm Power Purchasing Program, an initiative launched by Electricity Generating Authority of Thailand, aiming to make renewable energy the stable supply of future power.

The project plans to produce 500 million cubic feet(mcfd) of gas per day for 30 years, supplying 400 mcfd to China, and the remaining 100 mcfd to factories owned by the Burmese government, military and associated business elites. The losers from this venture are the Burmese people and environment.
