originally planned, which enabled Suriname to save more than US\$ 20 million on its electricity bill in 2021. Thus, the hydro power facility contributed clean energy to over 70% of Suriname's overall electricity requirement during the year. We maintained our resolve to remain a bottom-cost quartile producer to secure our

The Electricity Act also introduces Suriname's first legislation in favor of renewables. Renewable energy produced from solar and wind plants benefits from a purchase guarantee. State utility EBS is mandated to hold renewable energy tenders under the supervision of the EAS.

Clean energy is the gift that keeps giving: It can purify polluted air; Meet growing energy demand; Secure supplies; And connect billion of people to affordable power - helping to ensure electricity access to all by 2030. That is all while saving money and saving the planet. A fair, just, equitable, and urgent transition from dirty fossil fuels to clean energy is essential to ...

TotalEnergies is present in Suriname since 2019 in Block 58 where five significant discoveries have been made and is also exploring Blocks 6 and 8 since 2023. About TotalEnergies TotalEnergies is a global multi-energy company that produces and markets energies: oil and biofuels, natural gas and green gases, renewables and electricity.

So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.
