

Where is Drax based?

The principal downstream enterprises are based in the UK and include Drax Power Limited, which runs the biomass fuelled Drax power station, near Selby in North Yorkshire. The Group also runs an international biomass supply chain business. The company is listed on the London Stock Exchange and is a constituent of the FTSE 250 Index.

Who owns Drax Power Station?

In 1990, the electricity industry of England and Wales was privatised under the Electricity Act 1989. Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies.

What happened to Drax Power Station?

One significant change was the emergence of vertically integrated companies, combining generation, distribution and supply interests. In certain cases, it became necessary for generation assets to be divested, and so in 1999 Drax Power Station was acquired by the US-based AES Corporation for £1.87 billion (US\$3 billion).

Did Drax buy Opus Energy?

In 2016, Drax Group acquired Opus Energy for £340 million funded by a new acquisition debt facility of up to £375 million. In October 2017, Drax sold Billington Bioenergy for £2 million to an AIM-listed energy company called Aggregated Micro Power Holdings.

Where is Drax Power Station?

Drax power station is an operating power station of at least 2676-megawatts (MW) in Drax, Selby, North Yorkshire, United Kingdom with multiple units, some of which are not currently operating. It is also known as UK Oxy CCS Demonstration Project (White Rose CCS Project). The map below shows the exact location of the power station. Loading map...

How many people work at Drax?

In 2012, Drax employed over 700 people and provided about 7% of Britain's electrical power demand. The six units were served by independent wet limestone-gypsum flue gas desulphurisation (FGD) plant. The station's chimney is the tallest in the UK.

Renewable energy leader Drax is to invest £80 million in a major refurbishment of its iconic "Hollow Mountain" Cruachan pumped storage hydro power station in Scotland, increasing its capacity ...

Drax Power Station has evolved considerably since construction began in the 1960s. It has six boilers, four of which have now been converted to biomass. With each as high as a 15-storey office block, a main chimney almost twice the height of the London Eye, and over 1,800 miles of steel tubing, enough to stretch from John O'Groats to Land's ...

Renewable energy pioneer Drax has welcomed over 100 businesses, prospective suppliers and local communities to an event for the planned expansion project at Cruachan Pumped Storage Hydro Power Station.

Visit Drax Power Station; Visit Tongland Power Station; Visit Tongland Power Station . Tongland Power Station is the largest of the Galloway hydro scheme's electricity generation plants. The turbine house was built in the 1930s and offers an excellent example of early-modernist architecture applied to an industrial setting. Original features ...

The talented youngsters are joining the company's technical apprenticeship scheme at Drax Power Station, near Selby, in North Yorkshire. The plant is the UK's single-largest generator of renewable power, producing enough renewable electricity for ...

Power producer Drax DRX-0.40%decrease; red down pointing triangle is scouting locations in the American pine belt to build electricity generators fueled by burning wood chips. The plan calls ...

Drax, originally the largest coal-fired power station in Western Europe, underwent a significant transformation over the past two decades to switch from coal to biomass. Today, instead of burning coal, we use around 7 to 8 million tons of wood pellets annually, primarily sourced from the southeastern U.S. and western Canada.

Having converted Drax Power Station to use sustainable biomass instead of coal it has become the UK's biggest renewable power generator and the largest decarbonisation project in Europe. It is also where Drax is piloting the groundbreaking negative emissions technology BECCS within its CCUS (Carbon Capture Utilisation and Storage) Incubation ...
