

What is the energy capacity of Suriname?

Suriname's total installed electricity capacity (2010) was 355 MW. Currently, the country has a refinery with a capacity of approximately 7,500 barrels per day and imports oil from Trinidad and Tobago. Suriname is nearing self-sufficiency in the production of oil and could potentially join Trinidad and Tobago as a net exporter of energy.

How is electricity supplied in Suriname?

In Suriname, electric power is supplied to the Paramaribo area primarily by hydroelectric power (a 180 MW power plant that supplies around 75% of the energy) and diesel generators (66 MW of diesel generation). The electrification level in Suriname is estimated at 85%, with 79% of the population connected to the EBS system.

What is Suriname's Electricity permitting process?

Suriname's permitting process is detailed in a report by the Inter-American Development Bank, ESIA (Environmental and Social Impact Assessment for Energy Infrastructure Projects). Suriname's national electrical company EBS (NV Energie Bedrijven Suriname) is focused on improving reliability and sustainability of electricity.
