

Who is sustainpower?

SustainPower provides innovative and sustainable energy solutions that empower businesses and communities. Our experts design and manufacture high-quality, durable power generation and energy storage systems. With a focus on environmental responsibility and cutting-edge technology, we aim to transform how developing economies access and use energy.

What makes sustaingroup different from sustainpower?

The SustainGroup's brands integrate complex, clean energy technology in rugged packages, ensure turn-key delivery and provide operations and service supported by financing solutions. SustainPower provides innovative and sustainable energy solutions that empower businesses and communities.

Does Namibia have a big solar project?

Namibia has much larger solar and renewable energy development aspirations, as well. Both Namibia and neighboring Botswana are working with the World Economic Forum's (WEF) Global Future Council on Energy to develop a huge, five-gigawatt (GW) solar power project over the next two decades.

Does solar water solutions support Namibia's mega-solar development partnership?

Solar Water Solutions isn't directly involved in the Namibian government's mega-solar development partnership with the WEF Global Council on Energy, but company CEO Antti Pohjola sees it as a very positive development that should ripple across Namibia's power and energy sectors and boost sustainable socioeconomic development nationwide.

Will Namibia become a supplier of energy?

Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

New York, 4 May 2022 - Against the backdrop of a global energy crisis and worsening climate emergency, today the UN took a major step to catalyse the large-scale action and support needed for the transition to clean, affordable energy for all and net-zero emissions, with the launch of a Plan of Action by some thirty leading organizations comprising "UN-Energy".

A key component of the country's energy transition is to leverage its natural endowments to attract much-needed foreign direct investment. As it participates in COP26, Namibia has promised to reduce its ...

Toronto, Canada (April 6, 2021) - Canada Pension Plan Investment Board ("CPP Investments") is creating the Sustainable Energy Group (SEG), a new investment group that combines the organization's expertise in renewables, conventional energy and new technology and service solutions. SEG will generate compelling investment opportunities for the Fund, positioning CPP ...

Background: Namibia imports 60-70 percent of its electricity needs annually. At peak times, when coal-fired electricity use is highest, imports may rise up to 90 percent. 65 percent of these imports come from South Africa (±92 percent coal-fired sources). The remainder is purchased from the neighbouring utilities ZESCO (Zambia) and ZPC (Zimbabwe). Namibia has implemented [...]
