Where are the world's northernmost solar panels installed?

Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago,despite the region being plunged into darkness from early October until mid-February every year. Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago,a region plunged in round-the-clock darkness all winter.

Why do solar panels work in Isfjord Radio?

The solar panels also benefit from the "albedo" effect,the reflective power of snow and ice,as well as low temperatures that improve their efficiency. On the flipside,the region is plunged into total darkness from early October until mid-February,which makes it impossible for Isfjord Radio to completely give up fossil fuels.

The team has worked on three phases of solar for the Svalbard Airport, with a total of 40 kilowatts (kW) on the facade and roof of the airport terminal, and another 100 kW on the hangar.
