

It seems that civil engineering and mechanical engineering have met in the middle for a new type of energy storage. A Swiss startup named Energy Vault has showcased an unorthodox experiment -- they have stacked ...

Swiss company Energy Vault has just launched an innovative new system that stores potential energy in a huge tower of concrete blocks, which can be "dropped" by a crane to harvest the kinetic ...

Gravity Power and its competitor New Energy Let's Go, which acquired its technology from the now bankrupt Heindl Energy, are also looking underground for energy storage, but they are more closely ...

Applications of Gravity Energy Storage Technology. Grid Stabilization: Gravity-based energy storage technology systems can help stabilize the grid by storing excess energy ...

Cranes are a familiar fixture of practically any city skyline, but one in the Swiss City of Ticino, near the Italian border, would stand out anywhere: It has six arms. This 110-meter-high starfish of ...

Energy Vault has not had a smooth ride with its gravity storage technology, having had to redesign an earlier iteration that saw a central free-hanging crane raising and lowering bricks. A recent BloombergNEF report ...

Swiss company Energy Vault has just launched an innovative new system that stores potential energy in a huge tower of concrete blocks, which can be "dropped" by a crane ...
