

Why is Syria's energy sector in turmoil?

Syria's energy sector is in turmoil because of the ongoing civil conflict that began in the spring of 2011, with oil and natural gas production declining dramatically since then. Syria's energy sector has encountered a number of challenges as a result of conflict and subsequent sanctions imposed by the United States and the European Union.

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Does Syria have electricity?

Syria also had separate entities for the generation and distribution of electricity. Syria's oil sector has been in a state of disarray since 2011. Production and exports of crude oil have fallen to nearly zero, and the country is facing supply shortages of refined products.

What happened to Syria's oil & natural gas industry?

Syria, previously the eastern Mediterranean's leading oil and natural gas producer, has seen its production fall to a fraction of pre-conflict levels. Syria is no longer able to export oil, and as a result, government revenues from the energy sector have fallen significantly.

What happened to Syria's electricity sector in 2021?

In 2021, Syria's Ministry of Electricity estimated total losses to the electricity sector at USD 2.4 billion due to infrastructural damage and acute shortages of fuel and water needed to power Syria's thermal and hydroelectric infrastructure.

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

Energy and Natural Resources. Although Syria's crude oil reserves were small and production minor by Arab and international standards, in the 1970s and 1980s petroleum extraction played a vital role in Syria's economy, generating much-needed foreign exchange. However, the size of Syria's proven crude oil reserves remained secret.
