

What is Saneg energy?

Saneg Energy is dedicated to revolutionizing renewable energy solutions for a sustainable future through innovative technology and collaborative efforts worldwide. Our goal is to provide accessible, efficient, and clean energy systems that combat climate change and create a brighter, greener tomorrow for generations to come.

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Who is Saneg?

SAnEG is a globally recognized consulting, engineering, and trading firm, dedicated to delivering cutting-edge designs, environmentally sustainable solutions, and premium-quality products and services to our esteemed customers across the world.

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

What happened to Syria's electricity sector in 2021?

In 2021, Syria's Ministry of Electricity estimated total losses to the electricity sector at USD 2.4 billion due to infrastructural damage and acute shortages of fuel and water needed to power Syria's thermal and hydroelectric infrastructure.

How did US and EU sanctions affect Syria's electricity sector?

US and EU sanctions strained Syria's ability to import fuel and spare parts, and barred foreign entities (including European and Arab ones) from extending loans or implementing infrastructure projects in Syria's electricity sector.
