Do EV batteries need specialised storage in Europe?

The electric vehicle (EV) market is getting bigger and bigger in Europe, which means more and more batteries need to be produced globally. Here we analyse the EV battery market and the need for specialised storage on the continent to keep up with demand.

Will electric vehicle batteries satisfy grid storage demand by 2030?

Renewable energy and electric vehicles will be required for the energy transition, but the global electric vehicle battery capacity available for grid storage is not constrained. Here the authors find that electric vehicle batteries alone could satisfy short-term grid storage demand by as early as 2030.

Can electric vehicle batteries be used in energy storage systems?

Potential of electric vehicle batteries second use in energy storage systems is investigated. Future scale of electric vehicles, battery degradation and energy storage demand projections are analyzed. Research framework for Li-ion batteries in electric vehicles and energy storage systems is built.

Can electric vehicle batteries satisfy stationary battery storage demand in the EU?

Xu et al. (2023) have concluded that electric vehicle batteries can satisfy stationary battery storage demand in the EU by as early as 2030, but they did not consider the resource implications of displacing new stationary batteries (NSBs) by V2G and SLBs 15.

Can Li-ion batteries be used in energy storage systems?

Research framework for Li-ion batteries in electric vehicles and energy storage systems is built. Battery second use substantially reduces primary Li-ion batteries needed for energy storage systems deployment.

Can EV batteries supply short-term storage facilities?

For higher vehicle utilisation, neglecting battery pack thermal management in the degradation model will generally result in worse battery lifetimes, leading to a conservative estimate of electric vehicle lifetime. As such our modelling suggests a conservative lower bound of the potential for EV batteries to supply short-term storage facilities.
