

How many battery energy storage projects have won a bid?

Over a gigawatt of bids from battery storage project developers have been successful in the first-ever competitive auctions for low-carbon energy capacity held in Japan. A total 1.67GW of projects won contracts, including 32 battery energy storage system (BESS) totalling 1.1GW and three pumped hydro energy storage (PHES) projects totalling 577MW.

Which solar-plus-storage projects were bidding in Germany's latest innovation auction?

All the bidding projects from Germany's latest innovative auction were a combination of solar with energy storage. Image: Convergent Energy + Power. Germany's latest innovation auction has awarded contracts to 32 solar-plus-storage projects with a cumulative capacity of 408MW.

Are battery storage projects eligible for competitive power auctions?

Containerised battery storage units at a project in Hokkaido, northern Japan, where grid operator's rules require renewable generators to add storage. Image: Sungrow. Energy storage projects will be eligible to take part in competitive capacity auctions for low-carbon power set to be launched this month by the Japanese government.

Can energy storage projects take part in low-carbon capacity auctions?

Energy storage projects will be eligible to take part in low-carbon capacity auctions set to be launched this month in Japan.

How can automated bidding software improve grid reliability and efficiency?

"By implementing and utilizing cutting-edge automated bidding software for our projects, we will be able to improve grid reliability and efficiency while also supporting our customers' green energy transitions in a safe and reliable way," said Leo Moreno, AES clean energy president.

What is the biggest energy storage project in Sweden?

Neoen and Nidec announced construction of a 9 MW/93.9 MWh BESS- the largest BESS project in both Sweden and all of Northern Europe. It is expected to enter operation in the first half of 2025. BESS remained the mainstay of energy storage projects over the quarter, with a small number of PHS projects promoted.

Regular readers of Energy-Storage.news will likely be aware that grid-scale battery storage activity in Japan has shown early signs of being on an upward trend, with major Japanese players and foreign market entrants ...

Our storage technology lays the foundation for better energy storage products with industry-leading safety, integrated controls systems, and factory-built, highly modular building blocks. ...

Recently, with leading technical solutions and rich experience in energy storage project performance, Pinggao Group successfully won the bid for the EPC project of the 80MW/320MWh electrochemical energy storage power ...

The launch of the Electricity Sector Recovery Project, in 2022. Image: Ministry of Energy and Water Resources. The Ministry of Energy and Water Resources (MoEWR) of Somalia has issued a competitive tender for ...

Several countries announced or started construction of their largest ever battery energy storage system (BESS) projects to date. For example, Lion Storage announced its BESS project "Mufasa", with a capacity of 364 ...

Fluence announced an agreement with The AES Corporation, a Fortune 500 global energy company, to implement the AI-powered Fluence IQ Bidding Application to maximize the value of a 1.1GW portfolio of solar and ...

Recently, with leading technical solutions and rich experience in energy storage project performance, Pinggao Group successfully won the bid for the EPC project of the ...

The Ministry of Power has released a comprehensive framework to create an ecosystem for developing energy storage systems (ESS) to guarantee affordable, clean, stable, flexible, and secure power. The ...

LPO can finance projects across technologies and the energy storage value chain that meet eligibility and programmatic requirements. Projects may include, but are not limited to: Manufacturing: Projects that manufacture energy storage ...

The bidding volume of energy storage systems (including energy storage batteries and battery systems) was 33.8GWh, and the average bid price of two-hour energy storage systems (excluding users) was ...
