

What is Terabase Energy?

Terabase Energy is a solar technology company founded in 2019. Its mission is to reduce the cost and increase the scalability of solar by building an interconnected digital and automation platform for the development, construction, and operations of utility-scale PV power plants.

How is terabase transforming the solar industry?

From robotics-assisted construction automation to IoT-connected project sites, Terabase is modernizing the industry with its innovative approach to solar power plant deployment. Terabase's experts apply their deep industry experience to develop products that address the biggest pain points of the utility-scale solar market.

What is terabase?

Register now! Terabase is building an interconnected digital and automation platform that reduces cost and increases scalability. Products and services for the development, construction, and operations of utility-scale solar power plants. Terafab transforms solar power plant construction with a modern factory approach.

Why should you choose terabase?

Terabase's experts apply their deep industry experience to develop products that address the biggest pain points of the utility-scale solar market. By being a true project partner, customers can trust us throughout the entire project life cycle. We pride ourselves in being able to provide end-to-end support for all utility-scale solar projects.

What does terafab do?

Products and services for the development, construction, and operations of utility-scale solar power plants. Terafab transforms solar power plant construction with a modern factory approach. Watch the video of our first commercial deployment. Solar energy modeling and preliminary design tools for pre-construction and development.
