Need More Details On Market Players And Competitors?

Can the Netherlands be a leader in the European solar industry?

By taking concrete action now, the Netherlands can be at the forefront of the European solar industry, which will provide a crucial economic and strategic advantage on the long term. The province of Noord-Brabant is bringing back large-scale solar industry to the Netherlands. Goal: a 2 GW factory by 2027-2028 with new solar technologies.

Should Dutch solar projects be based on local interests?

According to Dutch solar developers, new projects should be conceived with local interests firmly in mind. For example, The Netherlands' 2019 climate plan stipulates that renewable energy projects should aim to allocate 50 per cent of the green energy they produce to local inhabitants.

Does the Netherlands have a solar farm?

Nearly 20 per cent of the low-lying country's surface is water, and solar power developers including GroenLeven have taken advantage by installing farms on man-made lakes. The company has installed more than 500,000 solar panels on Dutch waters, leaving the Netherlands behind only China globally in such siting, it noted.

What makes a European solar industry unique?

The European Solar industry must distinguish itself by its innovative products: high conversion efficiency and products for large-scale integration of solar technology that do not exist today. The programme links directly to European initiatives such as RePowerEU that aim to strengthen Europe's energy autonomy.
