## **SOLAR** PRO. Thermal storage lava energy storage

## How is thermal energy stored?

Sensible storage of thermal energy requires a perceptible change in temperature. A storage medium is heated or cooled. The quantity of energy stored is determined by the specific thermal capacity ( $(c_{p})$  -value) of the material.

Is lava rock a good heat storage medium?

In this study, a new type of porous and sensible heat storage medium called -lava rock was introduced. Lava rock has superior thermal and physical properties compared to the material used in DPSAH literature. This study aims to evaluate the effectiveness of the DPSAH system using lava rock.

What is a sensible heat thermal energy storage material?

Sensible heat thermal energy storage materials store heat energy in their specific heat capacity(C p). The thermal energy stored by sensible heat can be expressed as (1) Q = m &#183; C p &#183; D T where m is the mass (kg),C p is the specific heat capacity (kJ.kg -1.K -1) and DT is the raise in temperature during charging process.

What is the thermal distribution of lava rock in a heater?

In contrast, the temperature of lava rock remains consistent throughout the charging and discharging process, making good thermal distribution in the heater. Fig. 12. C2-DPSAH Lava Rock charge/discharge at ? = 0.02 kg/s for I = 590,800, and 1000 W/m 2.

Can lava rock be used as a heat storage double-pass solar air heater?

The present study used lava rock as the porous medium and sensitive heat storage double-pass solar air heater for thermal performance improvement. The experiment was performed on three sets of configurations: (i) DPSAH with no lava rock,C1-DPSAH,(ii) DPSAH with 50 % lava rock bed,C2-DPSAH,(iii) DPSAH with 100 % lava rock packed bed,C3-DPSAH.

## How does thermal storage work?

The air is heated by the heat source and will pass through the rock pile where heat is transferred to the rock and recirculated to the heat source, as shown in Figure 1. When needed, the heat from the thermal storage can be discharged using the same principle.
