

What is a Tier 1 solar manufacturer?

These manufacturers are renowned for their financial stability and consistent delivery of high-quality solar products. Attaining Tier 1 status underscores a manufacturer's credibility, which holds significance for project developers, investors, and customers seeking dependable panels.

What does Tier 1 mean in the photovoltaic industry?

The term TIER 1, in the context of solar panels, refers to an unofficial but widely recognized industry classification that identifies PV module manufacturers considered to be of high quality, reliability, and financial stability.

What is a Tier 1 PV module manufacturer?

"Tier 1 PV module manufacturers are those which have provided own-brand, own-manufacture products to at least six different projects, which have been financed non-recourse by six different commercial (ie not development, not export-import) banks, in the past two years." There is no mention of product quality.
