

Do fire departments need better training to deal with energy storage system hazards?

Fire departments need data, research, and better training to deal with energy storage system (ESS) hazards. These are the key findings shared by UL's Fire Safety Research Institute (FSRI) and presented by Sean DeCrane, International Association of Fire Fighters Director of Health and Safety Operational Services at SEAC's May 2023 General Meeting.

What is Battery Cabinet fire propagation prevention design?

Battery cabinet fire propagation prevention design: If an energy storage system is not compartmentalized, a thermal runaway event in a single battery is extremely likely to spread to neighboring cabinets, causing a massive fire in the entire container or even a sudden explosion.

What are the safety features in Delta energy storage systems?

Standalone units and compartmentalization management are key safety design features in Delta's energy storage systems, so that fire in a single battery module can be contained within that cabinet only.

Why should you choose a heat-resistant energy storage cabinet?

The interior of the cabinet is lined with heat-resistant ceramic material (temperature resistance: 1260 °C), which can effectively prevent the fires from spreading and burning while also ensuring the safety of other cabinets and the normal operation of the entire energy storage system.

What is battery energy storage fire prevention & mitigation?

In 2019, EPRI began the Battery Energy Storage Fire Prevention and Mitigation - Phase I research project, convened a group of experts, and conducted a series of energy storage site surveys and industry workshops to identify critical research and development (R&D) needs regarding battery safety.

What happens if a fire does not spread to neighboring cabinets?

Even if a fire does not spread to neighboring cabinets, the entire energy storage system would be rendered useless because of the toxic substance released after the thermal runaway in the Li-ion battery or the water used to extinguish the fire.
