

This paper provides a critical review of the existing energy storage technologies, focusing mainly on mature technologies. Their feasibility for microgrids is investigated in terms ...

The focus of this article is to provide a comprehensive review of a broad portfolio of electrical energy storage technologies, materials and systems, and present recent advances ...

La publicaci&#243;n Invertir en energ&#237;a: Guinea Ecuatorial 2023 (Energy Invest: Equatorial Guinea 2023) muestra la prometedor situaci&#243;n de la naci&#243;n de &#193;frica Central en el ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil ...

This infographic summarizes results from simulations that demonstrate the ability of Equatorial Guinea to match all-purpose energy demand with wind-water-solar (WWS) electricity and heat ...

Europe and China are leading the installation of new pumped storage capacity - fuelled by the motion of water. Batteries are now being built at grid-scale in countries including ...

Several African countries have formally expressed interest to join the groundbreaking Battery Energy Storage Systems (BESS) Consortium, launched Saturday during COP28, which could revolutionise Africa's energy ...

HOUSTON, March 26, 2024 - Houston-based Vaalco Energy has received final approval from the government of Equatorial Guinea for its Venus plan of development in offshore Block P, the company announced on Monday. All ...

Energy storage provides a cost-efficient solution to boost total energy efficiency by modulating the timing and location of electric energy generation and consumption. The purpose of this study ...

The project forms part of Equatorial Guinea's regional LNG2Africa initiative. ... the landmark regasification plant will enable the storage, transportation and distribution of ...
