

Who is aprovis Energy Systems GmbH?

Aprovis Energy Systems GmbH - Specialist In Exhaust Gas And Gas Treatment Technology. In a very short space of time, APROVIS has established itself as an innovative energy company on both the national and the international market. Our expertise lies in exhaust gas and gas treatment technology.

How much money does Tokelau spend importing fuels a year?

Tokelau spends about \$829,000 every year to import fuels. The government of Tokelau now plans to spend these savings on other essential services like health and education. The savings will also be used to repay the grants and financial assistance the government received from New Zealand government for this project.

What makes aprovis a good company?

APROVIS's performance is based on a strong foundation: its employees. These motivated specialists include electrical engineers (who make up 15% of our workforce), designers (20%), engineers (40%) and order processing staff (15%).

Powerful exhaust gas systems. APROVIS generates more energy from process cycles in combined heat and power plants - that's where our core capability lies. We focus on profitable heat extraction - which is efficient and economical for our customers and kind to the environment. Digital control during commissioning and digital remote access ...

APROVIS coordinates the catalytic converters with other components in the exhaust gas section to generate a high-performance system that runs reliably and reduces the impact on the environment as much as possible. APROVIS is the manufacturer of the entire product range, which keeps the necessary costs in check and still guarantees the best service.
