

Should Transnistria buy electricity?

"The elites in Transnistria acknowledge already that we buy electricity from the region not because we have to but because the alternative is to throw the region into a humanitarian crisis," Moldovan Energy Minister Victor Parlicov said in an interview. Still, officials are unequivocal: It's time to end the multi-generational deadlock.

Should Moldova buy Transnistria's gas?

In recent years, Brussels has given Moldova tens of millions of euros to build infrastructure and cement its connection to European energy networks, offsetting the costs of buying supplies from elsewhere. That means Moldova doesn't have to buy Transnistria's gas anymore, which could spell trouble for the breakaway state.

Should Transnistria end its energy monopoly?

Undercutting the breakaway region's cash flow by ending its energy monopoly offers a chance to heal the country's divisions and join the bloc as one nation. "Solving the energy issue with Transnistria would be a major step forward," said Viola von Cramon-Taubadel, a German MEP and member of the European Parliament's foreign affairs committee.

Should Transnistria be stopped?

Stopping payments to Transnistria would collapse the separatist state's budget and leave hundreds of thousands of people there without incomes and basic services -- a challenge that, for a country Moldova's size, would be akin to the reunification of Germany following the fall of the Berlin Wall.

How does Russia help Transnistria?

From the socio-economic point of view, stability in Transnistria has largely been enabled by considerable assistance offered by the Russian Federation through different means, including a scheme known as the " gas subsidy" which relies on Gazprom providing gas to the region effectively free of charge.

Why does Moldova rely on high-voltage cables in Transnistria?

Moldova also relies on high-voltage cables running through Transnistria, giving the region -- and its Russian partners -- even more leverage. "The beauty of it for the Russians was that by buying electricity from the Transnistrian region, we were basically financing the separatism in our own country," Parlicov said. The EU has changed that calculus.

Transnistria ou Republica Moldava da Pridnestr; um territ;rio situado na regi; do Leste Europeu que durante o s;culo 20 foi comandado pela antiga Uni;o Sovi;tica, ...

A large share of Transnistria's economy, including most of its budget, depends on a structural subsidy it

receives from Russia in the form of free gas. As Ukraine has promised to stop all Russian pipelines going through its territory by the ...

List of energy storage power plants . This is a list of energy storage power plants worldwide, other than pumped hydro storage. Many individual energy storage plants augment electrical grids by ...

The face-off has been tense, but maintained by a powerful connection: Moldova gets cut-rate Russian energy via Transnistria, which gets hundreds of millions of euros a year in return. The link allowed Russia to ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil ...

Transnistria's military threat cannot be ignored. Until the start of the Russian invasion of Ukraine on 24 February, the Transnistrian territory was supplied exclusively with diesel, the fuel used by the war machines, from the ...

The true cost of energy storage. The true value of energy storage isn't just monetary, or service or function related, but it is also social. It is needed to meet international agreements to limit ...

A developer of a mixed-use industrial park in Togo, West Africa initiated a tender for a large-scale solar plus energy storage project, and the park has issued a letter of intent (EOI). Pan-African ...
