

What is the optimization method of refrigerated truck insulation?

The optimization method is to meet the refrigeration capacity of the refrigerated truck insulation as a constraint, and the optimization algorithm is used to optimize the operating parameters of the system and adjust the operation strategy of the whole system.

How long does a no-idle truck air conditioner last?

CHARGES WHILE IT'S RUNNING. The no-idle AC unit can keep you cool for 10-14 hours. This no-idle truck air conditioning unit is a 12V system with an optional 400A Lithium battery bank that is charged while the truck is driven.

Can genetic algorithm reduce the energy consumption of refrigerating truck?

The results show that with the reasonable parameters, the genetic algorithm can be effectively applied to the optimization of refrigerating truck refrigeration system, which can reduce the energy consumption of refrigerating truck.
