

Smart grids are based on the use of ICT in order to optimise the quality and the cost of electricity generation, transport and distribution. Developing countries try to upgrade their electric grids to meet the evolving needs of the end consumers and face the energy challenge. The study of smart grid instauration in such countries must consider the disparity in terms of ICT infrastructures ...

This first phase will pave the way for a full-scale smart metering rollout across Tunisia. New digital tools and the use of data will revolutionize the way STEG carries out its operations, and its performance. ...

The smart grid project of the Tunisian Electricity and Gas Company (STEG) is one of the priorities of Tunisia's energy and climate policy. The aim of this strategy is for the country to reduce its dependence on natural gas imports by ...

"The smart grid will change the face of the energy system towards the use of renewable energies," said Tunisian Industry Minister Slim Feriani. At the forum on alternative energies, he pointed out that energy sector digitisation requires investments in technology and a change in the consumption mentality. Official data indicate that Tunisia ...

Les réseaux intelligents, également connus sous le nom de Smart Grid, jouent un rôle déterminant dans la transition vers une économie plus verte. Dans cette optique, un panel intitulé : Smart Grid, en est la Tunisie ? ...

The Tunisian parliament has approved taking a \$131.7 million loan from the French Development Agency for the implementation of a smart grid project. Parliament passed legislation regarding the 400 million dinar (\$131.7 million) loan plus a grant of \$1.1 million. The loan, to be repaid over 20 years with a grace period of up to 7 years, is part of the Tunisian ...

We estimate a median global sea level rise up to 52 cm (25-87 cm, 5th-95th percentile) and up to 63 cm (27-112 cm, 5th--95th percentile) for a temperature rise of 1.5 °C and 2.0 °C by ...

Contracts signed for 1st phase of SMART GRID project: 28/06/2022 11:07, TUNIS/Tunisia (TAP)- The contracts for the achievement of the 1st phase of the SMART GRID project were signed on Monday in Tunis, in the presence of Minister of Industry, Mines and Energy Neila Nouria Gongi, STEG CEO Hichem Annan and representatives of the French Development Agency (AFD), ...

Smart grids also allow for monitoring of asset quality, which enhances maintenance and repair operations. The programme is structured in two phases. The first phase (2022-2025) will see the deployment of a smart grid network in a pilot region consisting of three areas: Sfax city and Kerkennah, Sousse city and Sidi Bouzid, Le

Kram and Beja.

Po siedmiu latach portal Smart-Grids.pl i (już niewydawane) czasopismo „Smart Grids Polska” są nadal pierwszymi i jedynymi polskimi pozycjami, które kiedykolwiek patronowały targom. Aby wesprzeć nasze rodzime przedsięwzięcia w promocji podczas European Utility Week, na edycję 2019 wydaliśmy specjalny numer naszego magazynu.

Instalacje Smart Grids. Instalacje Smart Grids widziane z góry z lotu ptaka. Wokół zielony teren trawy i drzew. Fragment instalacji przesyłowej. Zdjęcie mocno skadrowane, na którym przedstawione są instalacje przesyłowe, na tle niebieskiego nieba. Pierwsza ilustracja przedstawia zabudowania, przed nimi panele fotowoltaiczne i drzewo.

o Le projet smart grid de la Steg : révolutionnaire et l'importance de la région, il impliquera une transformation en profondeur de l'opérateur public, la Steg. Cette dernière sera amenée à ...
