

Why is Pixii a modular energy storage platform?

The modular design of our energy storage is the result of decades of research and development in world class power conversion technology. The Pixii Research and Development Team enabled Pixii to be the first company to launch a modular and scalable energy storage platform.

What is the Pixii home battery?

Take a closer look at the Pixii Home battery and its features. With cutting-edge technology, the Pixii modular energy storage solution gives you a wide range of functions, allowing you to unleash your growth potential. I agree to receive other communications from Pixii AS.

How can Pixii contribute to a greener future?

The electrification of transportation, the fluctuations in energy prices, and the transition to weather-dependent renewable energy require flexible and scalable energy storage solutions. Pixii recognizes the pressing need for sustainability and provides modular and scalable battery energy storage systems (BESS) that contribute to a greener future.

Does Pixii home have a Smart Home Hub?

Pixii home comes with a smart home hub, allowing you to manage energy hungry home devices like cooling and heating to further reduce energy consumption without compromising on comfort. Unlock the flexibility market with our quick to deploy energy storage system. The PowerShaper is a modular system for up to 50kW.

Is Pixii a sustainable company?

Pixii's commitment to sustainability is evident in their contributions to optimizing solar energy use, peak shaving, arbitrage, and participation in flexibility markets. Pixii is headquartered in Norway, with its European sales headquarter in Germany and a global reach through offices and partners in several countries.

What is the pixiibox?

At the core of all energy storage solutions from Pixii, is the PixiiBox. An advanced bi-directional power conversion module. Bi-directionality means that the energy can flow both ways, from grid to the battery and back to the grid, through the same power electronics.

Pixii+ Pixii Plus A2572+ M-mount Rangefinder Digital Camera HK\$23,000.00 Pre-Order Products, takes 1 to 2 months Authorised Goods | 2 Years Warranty Pixii+ New Model A2572+ with extended rangefinder New Model A2572+ with extended rangefinder 26MP APS ...

The expected lifespan of the LFP batteries we are using in Pixii Home is around 10 years, although the exact lifespan can vary depending on factors such as usage, maintenance and environmental conditions. After 10

years of use, the ...

Pixii's first system for the Deutsche is a 6-hour one but Energy-Storage.news has been told of telecoms-focused solutions exploring durations of up to 72 hours. Finnish telecoms firm Elisa last week announced it would aggregate battery systems across its infrastructure network into a 150MWh virtual power plant (VPP), as reported by Energy ...

Pixii's battery energy storage system offers a range of advanced functions, including voltage support, phase balancing, and active and reactive power compensation. The BESS is modular and easy to install, with hot swappable modules for easy maintenance. It also comes with remote monitoring and a range of services and support, including ...

Pixii's battery energy storage systems with smart functionality enable telecom operators to better utilize these resources and address challenges in local grids. By introducing bi-directional converters, which can both provide power to telecom loads and feed excess energy back to the grid, telecom operators can make their assets more active ...

The Pixii PowerShaper is a modular battery energy storage system that optimizes energy use, helping you avoid costly grid upgrades. It comes with smart functionality like time shift and peak shaving to reduce your energy cost by storing power during low-demand periods. It integrates seamlessly with solar systems for PV self-consumption and ...

Pixii has been recognised as the fastest-growing tech company in Norway, securing the top position in the prestigious Deloitte Technology Fast 50 awards. "Pixii's proprietary solution combined with an incredibly impressive growth of 10.205 percent from 2019 to 2022 makes them the fastest-growing technology company in Norway and thus the winner of ...

The Pixii battery energy storage system offers a flexible solution for enabling efficient and cost-effective EV charging in parking lots and office buildings. It is modular, allowing for seamless scalability to meet your specific needs, and has a range of ...

ep Assets, part of energy transition company ep Group, has partnered with Pixii AS, a global leader in distributed battery energy storage and power conversion technology, to support Pixii's entry into the UK market. Named Norway's fastest-growing tech company in 2023, Pixii AS has developed a fully integrated, modular and scalable ...

Battery Energy Storage Systems (BESS) is the quick and easy solution to many of the problems facing DSO's: bottle necks, power quality, and cost and time of building an infrastructure. ... With cutting-edge technology, the Pixii modular energy storage solution gives you a wide range of functions, allowing you to unleash your growth potential ...

The Pixii OEM Inverter kit is a rack mountable bi-directional inverter shelving kit that provides OEM manufacturers with a modular and scalable inverter, designed for use by manufacturers of small- and large-scale Battery Energy Storage Systems (BESS). There are six OEM kits available in 10kW increments up to 60kW (1RU to 6RU).

The battery energy storage system supplied by Pixii has 1 MW of conversion capacity and 6 MWh of storage capacity. The solution is based on Pixii's proven PowerShaper product family. It is installed indoors at the central ...

At the core of all Battery Energy Storage Systems (BESS) from Pixii you find our bi-directional power conversion unit called the PixiiBox. Bi-directionality means that the energy flow can go both ways, from grid to the battery and back to the grid. It connects to a range of energy sources, like solar panels, the grid, generators, and more. ...

Pixii's BESS technology empowers C& I customers across the U.S. to reduce costs, enhance energy resilience, and capitalize on new revenue streams. Whether through OEM partnerships or direct solutions, Pixii is committed to delivering high-value, flexible energy storage solutions that adapt to the unique needs of the American market.

The expected lifespan of the LFP batteries we are using in Pixii Home is around 10 years, although the exact lifespan can vary depending on factors such as usage, maintenance and environmental conditions. After 10 years of use, the battery's capacity can gradually decrease, which can affect its performance and storage capacity.

The PowerBase is a robust energy storage system on a steel frame with the footprint of a standard ISO 20-foot container. It comes pre-wired and pre-configured to reduce installation cost and delivery time, and can hold up to 12 ...
