

Who is SEC energy storage?

SEC Energy Storage has been built with hundreds of years of combined experience in the energy industry. Today this foundation means we're ahead of the game as the industrial battery market matures. All of SEC's energy storage solutions are designed and developed in-house, using SEC's legacy technical blueprints.

What types of batteries does SEC offer?

SEC's industrial battery portfolio is all encompassing. With 2 volt and 12 volt cells in AGM and Gel Valve Regulated Lead Acid batteries, as well as Flooded, Tubular Plate, Flat Plate and Nickel Cadmium batteries. We are Hiring! Keep your finger on the pulse here with highly charged industry updates and info.

Why did SEC move away from batteries?

A focus shift in the business started to happen. SEC moved away from supplying only batteries to providing larger organisations with complete energy storage solutions. The company won a major contract to outfit the Saudi Bahrain Causeway with SEC solar lighting systems that are still in use today.

Why should the US Virgin Islands own solar assets?

The US Virgin Islands should invest in solar assets for enhanced portfolio diversification and risk mitigation. WAPA ownership guarantees coverage by WAPA and FEMA during natural disasters, eliminating uncertainties (1. Enhanced Portfolio Diversity: WAPA diversifies its energy portfolio, ensuring a more resilient and sustainable future).

How has SEC impacted the energy industry?

The energy industry is experiencing phenomenal growth. In response SEC has enhanced our strategy, expanded our business thinking and upgraded our product offerings. Innovation excites us but we also know that our legacy products are working hard in the marine, UPS and Telecom sectors to name a few.

Energy Storage: It's The New Black For A Reason. With technology progressing every day, society is on the cusp of huge change. SEC is the battery company on the frontline, fuelling discussions, educating suppliers and providing facts and figures to ...

Plug into the SEC Partner Grid . If you're in the renewables industry than an industrial battery partnership with SEC could be your gateway to success. The SEC Partner Grid will connect you with profit-generating opportunities to supercharge your business.

The SEC Microlyte MP series of VRLA monoblocs are a classic top terminal range of AGM batteries. They were designed as a cost effective but reliable solution for many uses, engineered with lead calcium plates to give them a triple benefit.

Our MICROLYTE Lithium-Ion battery series packs maximum power into a small package using a new patented nano-technology. SEC's Nickel Cadmium batteries use an innovative plate design for a combination of extreme reliability in harsh conditions, low-maintenance, and long life. View our entire airport battery range by clicking below.

SEC Industrial Battery was the first to use a patented technology to extend the design life and improve the performance of VRLA batteries. We called it the SEC CatVent and its been supercharging our batteries ever since. When inserted into the headspace of a cell, the CatVent helps to balance the electrochemical activity.

Energy Storage: It's The New Black For A Reason. With technology progressing every day, society is on the cusp of huge change. SEC is the battery company on the frontline, fuelling discussions, educating suppliers and providing facts and ...

Dependable power in any weather condition. SEC knows that the open water is no place for failure. Captains need absolute reliability. Good batteries will crank the engine every time, but great deep-cycle marine batteries are those manufactured for power and safety. That means high energy density, post seals which won't leak and explosion-proof vents.

The Nicad Avantgarde series features long, medium and high rate of discharge options allowing you to select the optimum solution for all industrial applications. These robust blocs single cells are built to German standards using a double perforated plate design.

The SEC Cellyte ETG series of OPzV VRLA Tubular Gel single cells is a traditional design that complies with International DIN standards. The range is engineered with die cast tubular grids and gelled electrolyte which reduces the need for topping up and makes the product virtually maintenance free.

Honeywell Process Solutions announced it will provide Massachusetts-based renewable energy developer VIElectron with its first installment of battery energy storage systems (BESS) to accommodate six ...

Reliable emergency lighting is critical to meeting health and safety standards. When the power goes out, the lights need to stay on - and if you've chosen the right battery, they will. SEC are globally renowned battery manufacturers. We make long-lasting Lithium-Ion, VRLA and AGM batteries that are vibration and shock resistant.

Plug into the SEC Partner Grid . If you're in the rail industry, partnership with SEC could be your gateway to success. The SEC Partner Grid will connect you with leads to supercharge your business. Then we'll throw in volume discounts, rewards, ready-made systems and a support network to help ensure growth in market share and profitability

SEC's CELLYTE UPS batteries are the first to use a CatVent(TM) catalyst in the cell headspace. This recombines the hydrogen and Oxygen gases produced during the charging cycle. Batteries without this

function are subject to depolarisation, which reduces the state of charge, increases the float current and reduces the lifespan.

The NicaCell flooded series features long, medium and high rate of discharge options allowing you to select the optimum solution for all industrial applications. These robust single cells are built to German standards using a double ...

The Microlyte MRT AGM battery is a premium product in the mainstream VRLA monobloc market. High tin plates mean a long float life product with a renowned cycling ability. Add in great high rate performance and you have a product that consistently outperforms all the competition.

What to expect from . Quality: 100% Made in the USA, for over 50 years. All batteries are delivered fully charged and ready for immediate use.. Price: Factory Direct Wholesale Pricing. Free delivery in the Continental US and Canada, batteries and chargers - excluding parts & accessories.. Leasing and financing options are available and encouraged. ...
