

Can a solar PV-plus-storage system improve resilience in Ukraine?

NREL is working with USAID, the Ministry of Energy of Ukraine, and the Ministry for Communities, Territories, and Infrastructure Development of Ukraine to design a microgrid pilot project that will demonstrate how a solar photovoltaic (PV)-plus-storage system could enhance resilience under the present conditions in Ukraine.

Should Ukrainian businesses invest in solar power?

Building a solar plant to meet self-consumption requirements, however, is simple and can secure substantial benefits. Ukrainian businesses pay, on average, roughly UAH 5.50/kWh (\$0.15) of electricity. During outages, this figure jumped nearly twofold, making the rationale behind investing in alternative power generation sources as clear as ever.

Should renewables take centre stage in the reconstruction of Ukraine's electricity system?

In their study, the researchers explain why renewables should take centre stage in the reconstruction of the Ukrainian electricity system. Using detailed maps, they show the situation before the war as well as the extent of the destruction and the potential for solar and wind energy.

Does Ukraine have a solar farm?

The Gnatkiv solar farm, one of Rengy Development's Ukraine project portfolio. Image: Rengy Development. Despite Ukraine's ongoing conflict with Russia, the country's solar sector continues to develop. Lena Dias Martins reports on the opportunities solar developers are finding amid the horrors of war.
