How does Greenlife solar work?

Once you start, GreenLife Solar will send you free quotes from a range of pre-screened solar companies that fit your needs. You can then explore your options at no cost or commitment! That means you'll always get the entire picture. Without spending time on research, you'll receive a database of pre-screened solar installers that you can trust.

Where can I buy solar panels in the UK?

At the end of September 2013, retailer IKEA announced that solar panel packages for houses would be sold at 17 UK stores by July 2014. The decision followed a successful pilot project at their Thurrock store, during which one system was sold almost every day. The panels were manufactured by the Chinese company Hanergy.

Does the UK get a lot of solar power?

While the sunniest parts of the UK receive much less solar radiation than the sunniest parts of Europe, the country's insolation in the south is comparable with that of central European countries, including Germany, which generates about 10.7% of its electricity from solar power.

What is the UK's first solar farm?

The first large solar farm in the United Kingdom, a 32 MW solar farm, began construction in November 2012 in Leicestershire, between the runways of the former military airfield, Wymeswold.

How many solar panels are there in the UK?

UK solar PV installed capacity at the end of 2017 was 12.8 GW, representing a 3.4% share of total electricity generation. Provisionally, as of the end of January 2019 there was 13,123 MW installed UK solar capacity across 979,983 installations. This is an increase of 323 MW in slightly more than a year.

At Greenlife Solar, we believe the best way to tell if you're getting a great deal is by comparing your options. Our system gives you the power of choice, without the stress that often comes with it. Simply browse your options without any ...
