

New Hampshire-based developer Granite Source Power (GSP) co-founder Jessica Shor disclosed to Energy-Storage.news that approximately 80% of the company's 1,250MW sale would be in ERCOT. Bulgaria's 3GWh standalone energy storage tender 4x oversubscribed. December 9, 2024.

The coal plant at Uskmouth while still operational in 2013. Image: Chris Allen. Investor Quinbrook Infrastructure Partners has acquired exclusive project development rights for a 230MW/460MWh battery energy storage system (BESS) in Wales, UK.

SAE is pleased to announce that the planned 230MW / 460MWh battery energy storage system at the Uskmouth site has been granted planning consent with conditions by Newport City Council. As announced on 24 May 2022, SAE has been working with Energy Optimisation Solutions ("EOS") and Quinbrook Infrastructure Partners, via their portfolio ...

Two large-scale storage facilities, each with a capacity of 230 megawatt-hours and an output of 115 megawatts, will be built on the site of a former coal-fired power station in Uskmouth, South Wales. Under the ...

The planned 230MW / 460MWh Battery Energy Storage System ("BESS"), will be located at the site of the former Uskmouth coal fired power station in south Wales ("Project Uskmouth") and will seek to utilise existing power transmission infrastructure and provide a new lease of life to the area. Uskmouth was acquired from Simec Atlantis Energy Limited ("SAE").

"SAE acquires full ownership of Uskmouth 120MW Battery Energy Storage System, strengthening its strategy to become an owner-operator and supporting UK's Net Zero targets." SAE has achieved the next step in delivering its "Building a Sustainable Future to 2035" strategy by taking full ownership of the 120MW Battery Energy Storage System ...

SIMEC Atlantis Energy has revealed plans to convert its Uskmouth Power Station in Wales, UK, from coal-fired to energy pellets. Using energy pellets that are produced from non-recyclable waste destined for landfill, the power station is expected to generate and export 220MW of baseload power to the grid.

London - 19 March 2024 - Quinbrook Infrastructure Partners ("Quinbrook"), a specialist global investment manager focused exclusively on the infrastructure needed for the energy transition, today announced a partnership with E.ON to ...

Strata Clean Energy announced the completion of the 70MW/280MWh Inland Empire Energy Storage project,

located in Rialto, California, 4 December. Premium. Hawthorne Renewable seeks permit for 1.2GWh hybrid BESS in Washington against backdrop of ...

Simec Atlantis Energy (SAE) has signed a contract with Energy Optimisation Solutions and Quinbrook Infrastructure Partners via the two's portfolio company Uskmouth Energy Storage (UES) to deliver a new 460MWh UK battery energy storage system (BESS).

Construction is underway on a new battery energy storage system (BESS) project, set to be one of the UK's largest. The project, located on the site of a former coal-fired power station in Uskmouth, South Wales, is a ...

Global investment manager Quinbrook Infrastructure Partners has teamed up with German energy company E.ON SE (ETR:EOAN) on the ongoing construction of a 230-MW/460-MWh battery energy storage system (BESS) at Uskmouth in south Wales, an announcement said on Tuesday.

Quinbrook Infrastructure Partners has gained project development rights for its 230MW/460MWh battery energy storage system (BESS) at former Uskmouth coal fired power station. The Uskmouth power station in Wales closed in 2015, and the new BESS will utilise existing power transmission infrastructure at the site including its 230MW grid connection.

SAE completed a share purchase agreement with Enso Green Holdings (Image credit: Pixabay) SIMEC Atlantis Energy (SAE) has taken full ownership of the 120MW Battery Energy Storage System (BESS) project at the Uskmouth Sustainable Energy Park.

The planned 230MW / 460MWh Battery Energy Storage System ("BESS"), will be located at the site of the former Uskmouth coal fired power station in south Wales ("Project Uskmouth") and will seek to utilise existing ...

"The Republic of the Marshall Islands (RMI) submitted its second NDC in 2018 at COP 24 in Katowice, making it the first country in the world to do so. The revised NDC set binding targets of reducing greenhouse gas emissions by 32 percent below 2010 levels in or before 2025 and by 45 percent before 2030.
