

Will a new solar micro-grid change Vanuatu's future?

On the remote island of Malekula, a new solar micro-grid is changing the lives of over 2,800 people -- boosting local development while contributing to Vanuatu's sector-specific target of transitioning to close to 100 percent renewable energy in the electricity sector by 2030.

What is a micro-grid in Vanuatu?

Launched in September in the communities of Wintua and Lorlow, the micro-grid is Vanuatu's first-ever community-run power system: members of the communities own and manage it. This keeps energy costs low as there are no external operation costs or profit margin are usually incorporated into an electricity fee and passed onto consumers.

How can a micro-grid power station be sustainable?

A well-structured maintenance plan, based on community capacity building by the local energy service company, will ensure the sustainability of the micro-grid power station. This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu.

What are advanced microgrid controls?

Advanced microgrid controls automatically optimize the operation of each resource to provide benefits like everyday electricity cost savings, supplementary power capacity, lower emissions, and resilience during utility outages.

Is a hybrid solar and hydropower minigrid transforming life in Loltong?

In the village of Loltong on the island of Pentecost, the recent deployment of a hybrid solar and hydropower minigrid has transformed life for its 300 residents. Previously, Loltong suffered from an almost complete lack of reliable power.

RIDGEWOOD, N.J.--(BUSINESS WIRE)--Scale Microgrids ("Scale") recently closed a first of its kind non-recourse project finance debt facility to fund the construction and operations of a ...

As a senior product manager at Scale Microgrids, Ben works across the organization to make compelling product offerings that delight customers. Prior to Scale, Ben ...

Deepa joins Scale with close to two decades of experience working in operations in the renewable space. Before joining Scale, Deepa was Senior Vice President of Operations at Primergy Solar and worked to develop Gemini, a 690 MWac solar + 380 MW battery energy storage project, which is one of the most sophisticated clean energy projects ever developed given its scale ...

Scale Microgrid Solutions to finance, acquire NY community solar. Share: twitter linkedin. Previous Scale announces it will finance up to \$55 million of capital for Urban Energy Inc. to develop community solar in New York City and beyond. Next Deal provides millions to deploy clean energy in New York City.

From 2011-2016, Ryan served as the President of ENER-G Rudox, Inc., a New Jersey based organization focused on developing on-site energy solutions for commercial and industrial customers. Under his leadership, the company developed several cutting edge sustainable energy projects that have received national acclaim.

The microgrid, which came online in 2018, was built and owned by Bridgeport Micro-Grid, a partnership between Controlled Air, a company based in Branford, Connecticut, OR& L Construction and Power Island Energy.. The project grew out of a microgrid pilot program run by the Connecticut Department of Energy and Environmental Protection in 2013.

BRANTV is bringing renewable energy solutions to 37 communities across Vanuatu, revolutionizing the lives of more than 50,000 people. The delivery model that BRANTV employs puts forward a commitment ...

FIMER has unmatched expertise in designing and building off-grid and grid-connected microgrids. Our portfolio encompasses the full range of enabling technologies including renewable power generation, automation, grid stabilization, grid connection, energy storage and intelligent control technology, as well as consulting and services to enable microgrids globally.
