

Are Varta energy storage systems safe?

VARTA energy storage systems are available as complete AC systems with an integrated battery inverter or DC systems, making them perfect for both retrofitting and new installations. When it comes to safety, we do not compromise. That's why we rely on a multi-level security concept, from development to installation.

What makes VARTA a good energy storage system?

Like all VARTA energy storage systems, VARTA element features high-quality lithium-ion cells. These can be charged and discharged quickly without any memory effect - the ideal conditions for a high level of self-consumption and therefore cost-effectiveness. VARTA technology is also impressively durable, reliable and safe.

Are Varta energy storage systems suitable for retrofitting?

The VARTA energy storage systems as AC all-in-one systems with integrated battery inverter are perfectly suitable for retrofitting as well as for new installations. Our new generation of DC high-voltage storage units.

How many kWh can a Varta element store?

VARTA element is available in three power capacities (3.2 kWh/6.4 kWh/9.6 kWh (VARTA element 3 and VARTA element 6 are extendible up to 9.6 kWh whenever needed) that cater for all storage needs, from small to big. Like all VARTA energy storage systems, VARTA element features high-quality lithium-ion cells.

Does Varta offer a warranty on batteries made in Germany?

As battery experts made in Germany, we give you up to 10 years' warranty - because we know we can rely on our energy storage systems. 2 As a technology company, VARTA is the only provider of energy storage systems to have more than 130 years of expertise in batteries made in Germany.

How can I monitor my Varta energy storage systems?

As certified installer you can monitor your storage systems within the VARTA portal. With more than 130 years of battery expertise made in Germany VARTA energy storage systems stand for quality and reliability. This also includes the training and certification of our partners.
