

Can a microgrid solve the energy problem in India?

Schematic diagram of a Microgrid. This article details the possibilities on the application of microgrids to solve the ever increasing energy problem in the country (India). Microgrids opens a gateway for integration of more efficient and cleaner renewable generations into the power distribution network.

What is a microgrid?

The concept of cluster of these microsources and loads, operating as a single controllable unit and providing electrical power to local area, has been given the name "microgrid" . Most of these microsources that are renewable in nature are highly intermittent in terms of the availability of power.

What are the different types of microgrid architectures?

AC,DC,and AC-DC hybrid microgridare some of the architectures proposed in literature. With multiple renewable energy sources providing electrical energy simultaneously,the load sharing among different sources has to be controlled according to the individual capacities of sources.

How a microgrid is connected to a grid?

Depending upon the mode of operation,an autonomous microgrid is connected to AC loads through AC bus. A microgrid operating in grid-tied mode is connected to main grid through AC bus where local AC loads are also connected . Fig. 2.2 presents the schematic diagram of AC microgrid structure. Figure 2.2. AC microgrid structure.

Does a microgrid need a communication system?

This necessitates a dedicated communication system for microgrid operation. Consortium for Electrical Reliability Technology Solutions (CERTS) has established that a without communication microgrid structure is a desired microgrid structure.

What is a dynamic model of a dedicated microgrid structure?

Dynamic model of a dedicated individual microgrid structure is presented as follows: $\dot{x}(t) = A x(t) + B u(t)$ $y(t) = C x(t) + D u(t)$ A dynamic model of all such dedicated microgrid units is obtained separately. Size of the overall system consisting a number of individual microgrids becomes significantly large.
