

How can Venezuela ensure reliable electricity access?

In the short run, to guarantee reliable electricity access Venezuela will need to import fuel to supplement hydropower, for example in the form of a floating storage and regasification unit to provide natural gas for generation, as well as power generators.

What are the statistics on electricity production in Venezuela?

Since 2009, there have been no official statistics on the electricity and energy sectors. Since the end of the 19th century, the production of electricity has been steadily growing in Venezuela. In between, there were some jolts due to prolonged droughts associated with the El Niño phenomenon.

Does Venezuela's electricity system collapse?

In this paper, the collapse of Venezuela's electricity system is analyzed. Two well-known recovery plans, the Venezuelan Electricity Sector Recovery Plan (VESRP) and the Country Plan Electricity (CPE), are described in detail, and their challenges are discussed in the context of the energy transition paradigm.

Why does Venezuela have a poor electricity system?

Since 2008 or even before, likely up to now, Venezuela has had an electric system in critical condition that is not able to satisfy the electricity demand, which has fallen because of the severe economic crisis, and offers very low-quality services.

Is Venezuela a state-owned electricity company?

While in May 2020 a new president was appointed to the state-owned electricity company, CORPOELEC (the post was previously occupied by the minister of electrical energy) the direction of Venezuela's sole electricity body is still not independent from the state.

Does PDSen 2020 - 2025 address the recovery of Venezuela's electricity system?

The government plan PDSen 2020-2025 does not address the recovery of Venezuela's electricity system. It is concluded that pragmatism is compelling both plans to restore the hydro-thermal dispatch model in force since the mid-1980s, leaving aside the economic and environmental advantages of decarbonizing the electricity sector from the start.
