Vicor Corporation is a leading provider of advanced power electronics solutions, specializing in power supplies and related products. With a rich history spanning several decades, Vicor has established itself as a trusted name in the industry, delivering innovative and high-performance power solutions to a wide range of markets and applications.

Vicor Corporation designs, manufactures, and markets innovative, high-performance modular power components, from bricks to semiconductor-centric solutions, to enable customers to efficiently convert and manage power from the wall plug to the point-of-load. Complementing an extensive portfolio of patented innovations in power conversion and power

The Vicor solution. A surveillance drone must maximize productivity while also being able to carry high-performance cameras and sensors. Vicor high-density power modules support all these power-hungry functions without adding unnecessary size and weight to the UAV, extending flight time allowing for more functionality.

Vicor has a portfolio of power-dense, low weight, low noise, highly reliable modular components that enable military equipment designers to create SWaP-C optimized solutions. A good example is our DCM(TM) family of isolated, regulated DC-DC converters. When compared to the next-best solutions in brick packages, our innovative ChiP and VIA ...
