

What are the main sources of electricity in Vietnam?

Coal-fired and hydropower plants are the two largest sources of electricity in Vietnam. Other energy sources providing electricity currently account for a small share, but their growth rates are increasing rapidly in line with the needs of the economy and the need to diversify the energy sector.

5.2. Fossil Energy (1) Coal

Will Vietnam face an electricity shortage?

Vietnam's Energy Ministry predicts that the country is likely to face an electricity shortage as the development of new power plants lags behind the country's rapidly growing energy consumption. The government allowed Vietnamese companies to have 100% foreign ownership in the energy sector.

Is Vietnam a tenth-biggest producer of solar power?

By last year, Vietnam had become the world's tenth-biggest producer of solar power. Underscoring his country's commitment to the energy transition, Pham Minh Chinh, Vietnam's prime minister, vowed in November to stop building new coal-powered plants and to reduce his country's emissions to net zero by 2050.

What is Vietnam's energy mix in 2023?

An analysis was conducted on Vietnam's energy mix in 2023, including the examination of power plant capacities and the volume of energy production from fossil sources (coal, gas, oil) and renewable sources (hydropower, solar energy, wind energy, biomass energy).

How good is Vietnam's energy system?

According to the World Energy System Index for the period 2018-2022, Vietnam held the following positions: 83rd place (2018), 91st place (2019), 65th place (2020), 61st place (2021), and 55th place (2022). Despite fluctuations, the overall trend is positive, indicating significant improvement in Vietnam's energy system performance over five years.

Why is energy transition important in Vietnam?

Vietnam emphasizes that its energy transition must uphold justice and the rights of all citizens. Beyond climate goals, a just energy transition is also a catalyst for achieving the sustainable development Goals (SDGs). The transformation of energy systems has created new jobs and increased access to clean and modern energy.

You could be forgiven for drawing comparison between the economy and business jet fleet in Vietnam and those in China. Much like in China, Vietnam underwent its own economic reforms during the 1980s, and just like in China, a government lead anti-corruption drive had a huge effect on the country's business aviation market in later years.
