

Will BP redevelop Kirkuk oil & gas fields in Iraq?

BP plc (BP) announced an agreement with the Iraq government to redevelop the Kirkuk oil and gas fields in northern Iraq, per a Reuters report.

Why is energy important in Iraq?

Energy in Iraq plays a crucial role in both the national economy and the global energy markets due to the country's vast oil reserves and significant status within the Organization of the Petroleum Exporting Countries (OPEC). Iraq holds abundant oil and gas resources and has strong solar PV potential.

How much natural gas did Iraq produce in 2022?

Iraq consumed significantly more natural gas than it produced in 2021, primarily for electric power generation. The country also flared over 630 billion cubic feet (Bcf) of natural gas in 2022 due to inadequate pipeline and processing infrastructure, making it the second-largest flaring country globally.

How much oil does Iraq have?

Oil provided 85% of government income. Iraq's oil reserves were the third biggest in the world, after Saudi Arabia and Iran. In 2009 the Iraq government set a target to increase oil production from 2.5-million-barrels (400,000 m<sup>3</sup>) to 7-million-barrels-per-day (1,100,000 m<sup>3</sup>/d) in six years.

Is Iraq a good country for solar energy?

Iraq holds abundant oil and gas resources and has strong solar PV potential. Its production to 2030 is set to be the third largest contributor to global oil supply. By the same year, the government expects that renewable capacity will amount for 5% of the country's total system capacity.

How has Iraq's energy system changed over the years?

This has introduced a number of vulnerabilities to Iraq's energy system. For example, payment issues last summer led to Iran cutting exports, significantly exacerbating electricity shortages in Iraq during peak seasonal demand. As oil production has soared, so has the amount of associated gas produced alongside.

Iraq holds the 12th largest natural gas reserves in the world, estimated at 131 trillion cubic feet (Tcf) at the end of 2022, predominantly located in large oil fields in the south and mostly associated with oil production. Despite these substantial reserves, Iraq faces regulatory, investment, and infrastructure challenges, which have kept natural gas production largely unchanged since 2016. The majority of Iraq's natural gas, about two-thirds, is produced as a by...
