

How much energy can a battery store?

For most battery systems, there's a limit to how much energy you can store in one system. To store more, you need additional batteries. And, in most cases, batteries can't store electricity indefinitely. Even if you don't pull electricity from your battery, it will slowly lose its charge over time.

How much does a battery cost on EnergySage?

The median battery cost on EnergySage is \$1,133/kWh of stored energy. Incentives can dramatically lower the cost of your battery system. While you can go off-grid with batteries, it will require a lot of capacity (and a lot of money!), which means most homeowners don't go this route. What exactly are home backup batteries?
