

What is the energy situation in Yemen?

Energy in Yemen refers to the energy and electricity production, consumption, and import in Yemen. Yemen is a net energy exporter. The primary energy use in Yemen was 87 TWh in 2008 and 88 TWh in 2009, which equates to 4 TWh per million people.

Is Yemen an energy importer?

Yemen is not a net energy importer, but it has the lowest level of electricity connection in the Middle East, with only 40% of the population having access to electricity. Rural areas are particularly badly affected.

Does Yemen have a power network?

Yemen has received considerable support for the development of its power generation network in recent years, with contributions coming from Saudi Arabia, France, the US, as well as multilateral donors such as the World Bank.

How much electricity is produced in Yemen?

5.665 billion kWh is the amount of electricity produced in Yemen (2007 estimate). Electrical consumption is about 4.133 billion kWh. Other information provided includes population growth statistics.

What is happening in the energy sector in Yemen?

In Yemen, a National Rural Electrification Program is now in place, and the construction of three substations, along with the necessary transmission lines, is currently under way. Yemen is also looking into the development of wind power.

Why did Israel launch strikes on Houthi-held parts of Yemen?

Israel launched strikes against ports and energy infrastructure in Houthi-held parts of Yemen on Thursday and threatened more attacks against the Iran-aligned militant group, which has launched hundreds of missiles at Israel over the past year.

Corruption in Yemen is a highly serious problem. Yemen ranked 176 out of 180 countries in the 2022 Corruption Perceptions Index is the most corrupt country in the Arabian Peninsula. [1] It is also the poorest country in the Middle East, "with an exceptionally high birth rate, acute rates of child malnutrition and rapidly dwindling reserves of oil and water."
