

# Yerevan pumped energy storage project bidding

How is Armenia transforming its power generation mix?

Armenia is making progress in further diversifying its power generation mix, particularly by aiming to build significant solar PV capacity. Armenia's 2021 Energy Strategy calls for up to 1 000 MW of solar PV capacity by 2030, at which point grid-connected solar is expected to account for 15% of generation.

Why does Armenia need a nuclear power plant?

Armenia depends on imports to meet much of its energy needs, particularly natural gas from the Russian Federation. It is one of the few ex-Soviet republics to avoid significant energy subsidies, and it is the only country in the Caucasus region to possess a nuclear power plant.

Can bioethanol production be exploited in Armenia?

Annual biogas potential of around 135-160 mcm is just beginning to be exploited, and the Renewable Energy and Energy Efficiency Fund recently produced an Assessment of Bioethanol Production, Potential Utilization and Perspectives in Armenia exploring possibilities for bioethanol production and presenting the concept to investors.

Will Armenia's energy sector transition through 2040?

The Armenian government approved the Energy Sector Development Strategic Programme (hereinafter "Energy Strategy") in January 2021, setting the path for the sector's transition through 2040. The publication and approval of this strategic document are welcomed and should form a useful basis for Armenia's future energy legislation.

Will Armenia introduce third-party access to gas?

An agreement signed by EAEU members in 2019 commits Armenia to introducing third-party access, among other reforms aimed at facilitating cross-border gas trade; a final agreement on this is expected to be signed in 2022. Around 85% of Armenia's gas supply is procured from Russia via pipelines passing through Georgia.

Are pumped hydro energy storage solutions viable?

Feasibility studies using GIS-MCDM were the most reported method in studies. Storage technology is recognized as a critical enabler of a reliable future renewable energy network. There is growing acknowledgement of the potential viability of pumped hydro energy storage solutions, despite multiple barriers for large-scale installations.

M.P. Power Management Company, Jabalpur has invited tenders for the procurement of 500 MW energy storage capacity for six hours of discharge with a maximum of four hours of continuous discharge for 40 years

...

## Yerevan pumped energy storage project bidding

Rajasthan Urja Vikas & IT Service Limited (RUVNITL) has petitioned to initiate a bidding process for securing 1000 MW of Pump Storage-based Energy Storage Solutions ...

The proposed process includes both technical and financial bidding stages, aiming to streamline the procurement of energy storage from these projects. Earlier this week, ...

Last evaluated by the government in 2022, Armenia's potential for energy efficiency is high. Cumulative energy savings for total final energy consumption will amount to 931 ktoe. ...

Shoals' Q3 2024 revenue falls 23.9% due to project delays, supply chain. Shoals Technologies Group, a U.S.-headquartered manufacturer of electrical balance of systems (EBOS) for solar, energy storage, and e-mobility, ...

Among those, lithium-ion battery energy storage took up 94.5 percent, followed by compressed air energy storage at 2 percent and flow battery energy storage at 1.6 percent, it said. Besides ...

This paper develops optimal pumped-storage unit bidding strategies in a competitive electricity market. Starting from a weekly forecasted market clearing price curve, an algorithm to ...

5 ???&#0183; The EU grant of more than EUR10 million will complement a EUR25 million EIB Global loan for energy efficiency improvements across Yerevan. The EU investment grant will help the ...

Indonesia's state-owned, vertically-integrated power utility, PT Perusahaan Listrik Negara (PT PLN) has launched a two-envelope bidding process without prequalification for the ...
