

Yutong Trucks, as an emerging sector of Yutong Group, relies on its complete vehicle capabilities, industry operational expertise, and advantages in new energy "battery, motor and electric control" technologies. Mixer Truck. Yutong Trucks, ...

These developments are propelling the market for battery energy storage systems (BESS). Battery storage is an essential enabler of renewable-energy generation, helping alternatives make a steady contribution to the ...

Taking whole vehicle controller, five-in-one controller, intelligent battery management system and inverter air conditioner as the core, Yutong ReCtrl forms a unique technical platform for full electric buses which has achieved ...

The brand-new architecture integrates hardware and software and was developed in-house by Yutong. Some highlights: batteries have higher energy and enhanced safety standard, with improved water and fire ...

DOI: 10.1016/J.JCLEPRO.2018.09.149 Corpus ID: 158378033; State of health estimation of second-life LiFePO4 batteries for energy storage applications @article{Jiang2018StateOH, ...

Yutong's YEA protection system conducts 24h continuous monitoring on nitrogen concentration to keep the battery in an oxygen-free environment, eliminating any combustion risk from the root. Battery of the bus ...
