

How much energy does a Yutong Bus use?

As batteries' energy density increases - and Yutong promises that it will - there will be two options: Retain the same battery volume and extend the range, or maintain the existing range while reducing battery size and cost. The Arriva bus uses approximately 1kW/h of energy per kilometre without air-conditioning or heating.

What is Yutong's energy-saving and new energy bus base?

The energy-saving and new energy bus base with an investment of 3.86 billion yuan was partially put into operation. Its annual planning. In 2013, Yutong officially launched ReCtrl technology which can accurately judge the real-time state of vehicles and intelligently match the optimal power combination.

How much energy does a Yutong E12 battery store?

The E12 demonstrator has 295kW/h of energy storage, although 320kW/h will be available. As batteries' energy density increases - and Yutong promises that it will - there will be two options: Retain the same battery volume and extend the range, or maintain the existing range while reducing battery size and cost.

Is the Yutong a good electric bus?

The driving experience is excellent, and it at least equals that of any other electric bus tested by route one. One characteristic of the Yutong is that when its accelerator is released, regeneration engages only very passively, and the effect is similar to lifting the throttle in a diesel bus.

Yutong launched the first "Integrated solution program of full electric buses" in China, providing you with comprehensive solutions of new energy buses that cover technologies, production, product portfolio, assessment, financing, ...

With the successive delivery of the 102 new energy buses, Yutong and Keolis will jointly provide better green modes of transport, and help Norway achieve the carbon emission reduction ...

Yutong Bus is the No.1 global sales of electric buses & coaches. We offer various new energy bus, tourist coach, and city bus for public transportation. ... High Efficiency and Energy Saving: ...

Now the company has fully mastered a number of core technologies of new energy buses, and can provide the most suitable mobility solutions for electric buses. Moreover, Yutong innovatively launched series products of hybrid and ...

Stable, Safe and Reliable, Attendance Rate up to 99%, Steady Running up to 1.5 Million km. A new era of new energy commercial vehicles has arrived with the continuous expansion of user needs and application scenarios;

It hosts a manufacturing floor space of some 600,000m² and an annual production capacity of 30,000 NEVs as its production base. Both NEV and traditional energy vehicles are manufactured on a total of 15 moving ...
