

# Zambia energy storage subsidy policy 2025

What is Zambia's national energy policy?

One of the critical objectives of Zambia's National Energy Policy of 2019 is to increase electricity access to improve the lives of Zambians. To operationalize this, it has included the development of mini-grids in the integration plan for the policy, implemented between 2020 and 2025 (The National Energy Policy, 2019).

How can Zambia improve electricity supply?

Financing of six projects, improving the electricity supply to 200,000 Zambians. Provide over 50,000 people and 500 small and medium-sized enterprises with access to energy. 300,000 off-grid electricity connections bringing clean energy access to 1.6 million people across Zambia.

Can battery storage be used with solar photovoltaics in Zambia?

The Zambian regulation foresees customs duty and VAT exemptions for most equipment used in renewable energy or battery storage projects. Detailed information is provided in In this section, we discuss the opportunity of battery storage in combination with solar photovoltaics from a financial point of view.

What were the first major energy reforms in Zambia?

The first major energy sector reforms in Zambia occurred in the 1990s with the formulation of the National Energy Policy 1994 (NEP 1994), the establishment of the Energy Regulation Board (ERB), the abolishment of the Zambia Electricity Supply Corporation (ZESCO) Limited monopoly and the participation of several private operators.

How can transport save energy in Zambia?

The energy intensity of transport sector in Zambia is 14% higher than the global energy intensity. This presents an opportunity to save energy in the sector. The recommended actions must spur progress in two main areas and increasing the availability and use of sustainable, low-carbon fuels.

Can a mini-grid solve energy access challenges in Zambia?

Access to reliable electricity is a fundamental driver of economic development and improved quality of life. In Zambia, as in many parts of the world, the mini-grid sector has emerged as a promising solution to address energy access challenges in remote and underserved areas.

Energy storage deployment have already seen positive results with the deployment of stationary energy storage growing from about 3 GW in 2016 to 10 GW in 2021. It is envisaged that the ...

Synchrostor and Cheesecake Energy are to receive \$9.4 million each to fund their energy storage systems and Invinity Energy Systems receiving \$11 million to develop a vanadium flow battery. It is the latest round ...

A new subsidy scheme for residential solar-plus-storage installs is now live in Bavaria. The state in southern Germany will provide EUR500 (US\$550) for a storage system of at least 3kWh and a ...
